

ATF Stop Leak | Automatic transmission stop leak

Property

- regenerates and protects rubber and neoprene seals in automatic transmissions
- reduces oil consumption

Application area

- suitable for all automatic transmissions and power steering systems containing ATF fluids in cars and trucks
- compatible with synthetic and mineral automatic transmission fluids

Dosage

- Add 1 x 375 ml bottle to the automatic transmission fluid (adequate for 4-8 litres). Add 5-10% for other volumes. Can remain in the system until the next oil change.

Typical properties

Eigenschaft	Einheit	Wert
Color	-	red

Available packaging

375 mL bottle	Case 12 x 375 mL bottles
